ABOUT ME

Passionate about cybersecurity, focused on offensive security, networking and Linux. Currently preparing the eJPT certification and building my own projects (reconnaissance automation, Python tooling) to keep growing professionally.

EXPERIENCE

Penetration Tester / Cybersecurity Auditor

2021 – 2025

VirtualProtection

- › Performed penetration tests and security assessments on applications, services and infrastructure.
- › Identified and analyzed vulnerabilities, assessing their impact and potential exploitation vectors.
- › Reconnaissance and enumeration of assets, services, technologies and attack surfaces.
- › Web security assessment: SQL Injection, XSS, Path Traversal and access control issues.
- › Used Nmap, Burp Suite, Gobuster, Dirbuster, Wfuzz, Metasploit, SQLmap, Hydra, John the Ripper and Hashcat.
- › Analyzed services and protocols: HTTP/HTTPS, SSH, SMB, FTP and Kerberos.
- › Developed Python scripts to automate reconnaissance, analysis and security testing.
- › Documented vulnerabilities, technical evidence and remediation recommendations.
- › Applied penetration testing methodologies and offensive security best practices.

CERTIFICATIONS

Offensive Python	Hack4u.io hack4u.io/certificate/1647-6136-1045-3499
Intro. Hacking	Hack4u.io hack4u.io/certificate/9980-1075-3789-9197
Web Hacking	Hack4u.io hack4u.io/certificate/0853-7112-1765-0028
eJPT	In progress

HACK THE BOX

Profile	Script Kiddie · Level 26 (Apprentice) app.hackthebox.com/users/828180
Machines	15 / 552 rooted · weekly streak: 3 weeks
Rooted	Reactor, Cap, Enigma

FOCUS AREAS

PENTESTING

Web, network, Active Directory, privilege escalation, Red Team.

LINUX

Administration, scripting, automation, custom tools.

NETWORKS

TCP/IP, DNS, HTTP/HTTPS, SMB, MQTT, routing.

PYTHON

Automation, scripting, security tools, data analysis.

PROJECTS

recon github.com/xX-DarthBear-Xx/recon

Automated reconnaissance framework for penetration testing labs (Python).

ENVIRONMENT

Kali Linux · zsh · bspwm · kitty

Penetration Testing · Vulnerability Assessment · Web App Security · Ethical Hacking · Network Security · Burp Suite · Nmap · Metasploit · Python · OWASP · Linux · Active Directory
